The screenshot shows the vSphere Client interface. The top navigation bar includes the VMware logo, 'vSphere Client', a menu, a search bar, and the user 'Administrator@VSPHERE.LOCAL'. The left sidebar shows a tree view with 'vcsa-whiplash-00.cpbu.lab' expanded to 'Houston' and 'VM Network', with 'DVS-007' selected. The main content area displays the 'DVS-007' summary page. A warning dialog box is open, titled 'DVS-007', with the message: 'Upgrades are available for the distributed switch. To perform an upgrade, use the Actions menu.' Below this, it says 'Distributed Switch' and 'The distributed switch is not the latest version.' The background shows the 'Summary' tab with fields for 'Manufacturer: VMware, Inc.' and 'Version: 6.0.0', and a note that 'Upgrades available'. Other tabs like 'Monitor', 'Configure', 'Permissions', 'Ports', 'Hosts', 'VMs', and 'Networks' are visible. At the bottom, there are sections for 'Switch Details', 'Notes', 'Tags', and 'Custom Attributes'.
